ALL PREMIUMS WILL BE AVAILABLE AT WWW.ASCA.ORG

Rules

A dog is only eligible for one award category. Make a note on the entry form of the first trial that you enter stating which category you are vying for, even if you are only entering one weekend. Otherwise, you will be automatically entered into the category deemed appropriate by the recording secretary.

Scores will be taken from all runs, qualifying or not. The exception is if the Handler or Judge calls time and the dog receives a "JCT" or HCT", then a zero will be entered for that run.

You must be entered in all 3 stock. You do not have to be entered in all 3 trials but obviously it is to your advantage to do so.

Scores will be taken from up to 10 runs per stock. If a dog receives more than 10 scores for one or more type of stock, the top & bottom scores will be dropped for each type of stock to equal 10 runs. If the dog has 11 scores, it's top score will be dropped.

All WTCH dogs will be tabulated equally.

All Open/Non-WTCH dogs have the option of moving up to Advanced anytime during the Series and will remain in the Non-WTCH category regardless of whether they earn their WTCH during any of the 3 weekends. The dog must not have earned a WTCH prior to entering the first trial they are running in.

All Started dogs will be tabulated equally, as long as they stay in the Started class. Once they move up to Open, they will be tabulated in the Open/Non-WTCH category and will bring their Started scores with them.

For dogs entered in both Started & Open classes for different stock, you will be tabulated in the Open/Non-WTCH category.

All running tabulations will be available to view after the 1st & 2nd trial weekends at www.NNASC.com so you can see who's sitting on top. 😊
